SUMMARY
Senior Machine Learning Engineer with 5+ years of experience developing, training, and deploying scalable machine learning mod

EXPERIENCE
Senior Machine Learning Engineer | DataScale Systems (2021 · Present)
· Architected, trained, and deployed end-to-end machine learning models using Python, PyTorch, and Scikit-learn, improving predi
· Designed robust ETL and feature engineering pipelines handling 50M+ daily events using SQL, Pandas, and PostgreSQL.
· Containerized production model inference APIs with Docker and FastAPI on Linux, reducing P95 latency from 180ms to 42ms.
· Built automated testing and continuous deployment pipelines using Git and GitHub Actions with 99.9% uptime.
· Optimized relational database queries and cache layers, decreasing backend memory overhead by 35%.

Machine Learning Engineer | Apex Analytics (2019 · 2021)
· Developed predictive analytics solutions and automated feature engineering using Python, Scikit-learn, and SQL.
· Engineered scalable RESTful data services using FastAPI and PostgreSQL, serving 1M+ daily active requests.
· Implemented rigorous data validation and statistical testing frameworks to maintain model integrity.

SKILLS
Programming: Python, SQL, Bash, C++
Machine Learning: PyTorch, Scikit-learn, Pandas, NumPy, Statistics, Feature Engineering, NLP
Infrastructure & Tools: Docker, Linux, Git, GitHub Actions, FastAPI, PostgreSQL, Redis
